

Hello Everyone

Hope your all well.

Well Easter is over and Anzac Day done for another year. SO things are now back to normal.

So it's a good time to give you an update on how we are progressing.

Our Senior team had a great win on Saturday night under lights, beating West Coburg by 68 points. We are now 2 wins and 1 loss, sitting 5th on the table. The team is very close and as mentioned last year, the culture of the playing group is outstanding.

The reserves are winless, but have been playing well together. They have been in every game, but seem to tire out after half time. Justin Marcy has been great as the new reserves coach; he has the boys all tight.

Our Under 19s are flying a 72 point win has put us into 3rd spot. So many exciting young kids coming through. A very big future for the seniors next year with most of these kids going into the seniors next year. We area huge chance for a crack at the flag. Still lots of work to do yet though. Keeping a lid on it.

Our women's senior team has been a revelation for us this year. They have been playing great footy, but also added so much more to the club. They are exciting to watch; they help out on the committee, and also help our junior teams. Such a new and exciting dynamic change to our club.

We have still lots of work to do in 2019 to get our club where it needs to be , but we are creating such a sensational family environment now, and with the influx of women into the club, it has really made our club breathe new life. We still need as much support as possible to continue to help our Tullamarine community.

We have a Drug and Alcohol forum this Thursday at 6.30pm to help educate our community on the danger and issues it causes. We will continue to push this forum as we want to protect our people and help them .

I would like to thank you all again for your support, and please come down to watch our teams play.

We are home this week , so it would be great to see you all there.

Please have a good and safe week, and I will update you all again soon.

Kind Regards,

Peter Labbad
